Claims 1-3 and 10-15 are considered below.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Walker et al. (Journal of Virology, Dec. 1995, p. 8173-8177) for reasons of record.

Claim 15 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Baker et al. (Journal of General Virology, (1995) Vol. 76, No. 8, pp. 2081-2084) for reasons of record.

Applicants' arguments filed October 17, 2003 have been fully considered but they are not persuasive. Applicants essentially state that the references of the rejections are silent with respect to increased fidelity of polymerase due to a gene modification.

The examiner contends that the instant claims are extremely broad and fail to set forth a specific genome wherein a polymerase gene modification imparts increased attenuated fidelity. Thus, it is asserted that applicants' invention fails to claim the modifications responsible for said fidelity. As such, applicants fails to meet their burden of showing that the products as claimed differ from the art products. The products of the references appear to be the same or obvious or analogous variants of the products broadly and non-specifically claimed by applicants because they appear to possess the same or similar functional characteristics. Since the Patent Office does not have the facilities for examining and comparing applicant's products with the products of the prior art reference, the burden is on applicants to show an unobvious distinction between

the material structural and functional characteristics of the claimed products and the products of the prior art. See In re Best, 562 F.2d 1252, 195 U.S.P.Q. 430 (C.C.P.A. 1977).

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
